İKİ NOKTA

Company & References

Project-based engineering across automation, mechanical, electrical and design disciplines.

ikinoktaeng.com

EN

We consider where a design will be put to work.

İki Nokta is a mechatronics company delivering on-site installation, commissioning, handover and, where required, operational services for electrical, electronic and automation-based projects.

Since 2004, we have brought design, production and site delivery together within a defined technical scope. We focus on coordination across disciplines in projects carried out simultaneously in different countries.

2004

SINCE

Four complementary capabilities.

01 Industrial Automation

PLC and SCADA-based control, machine automation and process monitoring.

02 Mechanical Systems

Custom machine design, manufacturing and mechanical system integration.

03 Electrical Engineering

Power distribution, control panels and electrical infrastructure tailored to the project scope.

04 Design and Prototyping

CAD, 3D modelling and prototyping to develop production-ready solutions.

01	02	03	04
Understand the need	Design the solution	Produce and implement	Verify and support
